FEATURED PROJECTS

LWS-Kart:

[Github Link](#), [Live Link](#)

LWS-Kart is a comprehensive full-stack ecommerce application designed for selling furniture online.

Key Features:

User Authentication: Secure user registration, login, and profile management using JWT authentication with NextAuth. Supports login via Google, Facebook, or credentials. Users can update their information.

Product Display: Products are displayed using APIs created with Mongoose. Users can search, filter by category, price, and size.

Shopping Features:

- Add to Cart: Users can add products to their cart.
- Wishlist: Users can add products to their wishlist, which are displayed on a dedicated wishlist page.
- Checkout: Users can checkout after adding products to their cart with form validation in place.

User Restrictions: Users must be logged in to add products to the cart or wishlist. Products intended for the cart before login will be saved and displayed after login.

Social Sharing: Products can be shared on social media.

Multilingual Support: The site supports both English and Bangla.

Technologies Used: Next.js, React, Next-Auth, Tailwind, Mongoose, MongoDB
